At Bay Island Early Learning and Care we implement a positive sense of identity by our enriched Walk About Wednesday experience accessing a range of resources that can be used to extend their play experiences by imbedding the importance of community connectiveness, our environment and being involved in their own learning experience which strengthens children's interests and skills in being and becoming active contributors to their world.

Thank you Tammy for bringing in your beautiful baby girl and showing the children how to bath, dress and feed her. This was a great authentic learning experience with the children to show the connection between role playing and real-life experiences. The children loved this experience so much.

### Wheel of Well-being

Body. Mind. Spirit.  
People. Place.

Planet. Research is showing us how our health and happiness can be boosted by doing

certain things on a day-to-day basis. The Wheel of Well-being is your guide to some of them.

Belonging shapes who children are and who they can become. They can identify themselves by belonging to their family, cultural groups, neighbourhoods and the community. When a child understands that they are part of a group or feel as though they are part of a family you know they have grasped the concept of belonging.

*"Education is the most powerful weapon we have to change the world" — Nelson Mandela*
